01

APPLICATION

Application 1

The SPON XC-9000APP supports two-way audio and video intercom over both local area networks (LAN) and 4G wide area networks (WAN). During intercom sessions, it allows hands free talk,push-to-talk (PTT) and remote door unlocking (unlocking function is only available on the Android version).

Application 2

The SPON XC-9000APP can be used over a local area network (LAN) or a 4G wide area network (WAN) to initiate file broadcasting or real-time paging to IP amplifiers or IP speakers.

03

APPLICATIONS

Application 3

The SPON XC-9000APP is compatible with remote workstation functions, allowing users to monitor terminal status and adjust terminal volume remotely. It supports initiating real-time file or text broadcasts, scheduling or modifying timed broadcast tasks remotely, and previewing, listening to, or uploading audio files to the XC-9000 server's media library in real time.
